

GLOBAL TORQUE SOLUTIONS

from the Heart of the Silicon Valley

MOUNTZ.

THE TORQUE TOOL SPECIALISTS®

**Mountz has been a leader in the torque tool industry
for more than 50 years.**

Based in California's Silicon Valley, a global centre for technology and innovation, Mountz tools are available in over 60 countries worldwide, with global service and technical support.

Mountz focuses on delivering high quality torque products, services and solutions, so that our customers can always proceed with confidence.

We provide our customers with exceptional quality and service, so that you always have the right tools for the job and the results your business demands.

Above all, we are committed to forging a safer world through accuracy and precision, right across the manufacturing process.

Our Silicon Valley roots inspire us to question, challenge and improve, every day.

HAND TOOLS

PRECISION TORQUE YOU CAN TRUST

Smarter manufacturing environments are demanding higher quality tools for precise assembly applications.

Mountz torque wrenches and screwdrivers are tools you can trust for even the most critical fastening applications.

Versatile, accurate, and reliable, Mountz torque wrenches go where they're needed, even when compressed air and electric power are not available. Mountz click wrenches, break-over wrenches, and cam-over wrenches meet diverse fastening needs, whilst eliminating the risk of over or under tightening.

For industries with stringent torque requirements and zero tolerance for failure, Mountz torque tools meet or exceed the accuracy and repeatability requirements of ISO 6789.

In these demanding environments, you can trust Mountz Tools to deliver, time after time.

SCREWDRIVERS

Quality and Innovation

Mountz precision FG Torque Screwdrivers are the most advanced hand tools in the world. Engineered to deliver the correct torque with confidence with our advanced cam-over technology, regardless of task and operator skill level. These tools offer enhanced product quality and guaranteed regulatory compliance, staying in calibration four times longer than industry standards. The result is unmatched quality, accuracy, and precision for all fastening applications.

SLIPPING WRENCHES

Accurate and repeatable results

Slipping Wrenches eliminate the possibility of over-tightening, by allowing the tool to slip free when the desired torque value is reached. These tools are perfect for maintenance and production applications where the risk of overtightening is too great. Mountz slipping wrenches ensure accurate process control and offer precise and repeatable results.

CALIBRATION EQUIPMENT

THE NEXT GENERATION OF TORQUE VALIDATION

MEET THE EZ-TORQ 111 TORQUE ANALYSER

The next generation EZ-TorQ III Torque analyser has been developed to make torque control more accessible across every area of your business from the calibration lab to the assembly station.

It provides a more convenient and efficient means of ensuring that small hand and non-impacting power torque tools are accurate every time.

Highly portable and user-friendly, this battery-powered tool can be easily carried around the assembly line as part of a QA programme, or used at assembly stations for quick and easy torque validation and calibration. The new smartphone-like touch-screen interface ensures quick and easy validation between 11.3 cN.m to 3390 cN.m.

In the manufacturing and assembly world, the consistent and accurate application of torque is imperative for production efficiency, product quality and product safety.

With Mountz torque analyzers and sensors, you can test tools before they go into service every day. This prevents users from working with mis-calibrated tools and enhances quality management and efficient production.

Mountz has many options to choose from, including stand-alone sensors for hand and power torque tools and run down adapters that simulate actual joint conditions.

But it doesn't stop there - we are always looking for 'what's next'.

POWER TOOLS

POWER,

PRODUCTIVITY AND PRECISION

To keep up with the demands of modern manufacturing environments, you need tools that are faster, smarter, more accurate and more powerful than ever before.

Mountz answers that demand with a full line of innovative electric and pneumatic power tools and automation systems, that reduce labour costs and increase productivity – from the simplest repairs to the most technical manufacturing projects and everything in between.

As your torque experts, we understand your need for accurate, precise and durable torque tools whatever the application.

AT A GLANCE

- ELECTRIC SCREWDRIVERS
- AIR SCREWDRIVERS
- PULSE TOOLS
- DC CONTROL TOOLS
- AUTOMATION SCREWDRIVERS
- TORQUE ARMS
- TOOL BALANCERS
- SCREW COUNTERS
- POWER TOOL ACCESSORIES
- PNEUMATIC TOOL ACCESSORIES
- SCREW PRESENTERS

MD SERIES DC TORQUE CONTROL SYSTEM

AUTOMATED PROCESS CONTROL

FOR HIGHER PERFORMANCE

As assembly designs get more complex and production speeds increase, lean manufacturers strive to increase efficiency with more sophisticated tools.

To meet this need, a single Mountz DC Torque Control system can do the work of 2-15 regular tools and can remember up to 15 process sequences with 10 program steps.

The Mountz DC Torque Control tool is a reliable torque and automation fastening system engineered for precise, accurate and repeatable torque control. The tools are easy to programme, giving you the flexibility you need to carry out varied and complicated manufacturing processes.

The extensive benefits include reduced labour costs, maintenance costs, production times and improved productivity.
